

HAVE YOU EVER MADE A LEGO SEAPLANE?

The W&L Gender Development Lab is interested in how children play with Legos, and we want to see what you like to build!

Who: Children ages 6-10

What: You'll build a Lego seaplane, and then you'll build a destination and play with what you've made. This study takes about half an hour.

Where: The W&L Gender Development Lab, located in the Science Center. We can meet you by Lee Chapel to show you where to go!

When: Whenever you're available! Email us at fulcherlab@gmail.com to set up a time to come in.

Participants will receive a Lego gift bag
as a thank you for helping us out!
